1. The production of the Blaupunktwerk Berlin will reach 60,000 sets in 1947, provided the supply of tubes is maintained. The costs of manufacture have doubled. The production plan envisages two types only in the price range 300-500 RM. The 4-tube "Super" Blaupunkt type will cost 420 RM from the plant. The complement of workers at the Blaupunktwerk is 1,100.
2. There are 1,500 workers at the Lorenz (International Telephone and Telegraph Co.) works in Berlin. They are producing a "Super" model at 500 RM and an automobile receiving set at 265 RM.
3. Telefunken (AEG) Berlin has 2,000 workers. It produces two models costing 320 and 470 RM respectively. Fifty percent or more of the total production is used for "barter" agreements and very few sets go on the civilian market.
4. Raw materials, in particular molybdenum and wolfram for tubes are extremely difficult to obtain. The production for Telefunken is 500,000 - 600,000 tubes p.a. (5% of peace-time).
